

Academic

Courses of Study

Elementary | K5-Grade 5

Atlantic Christian Academy's Elementary program offers the basic foundation of learning for every child. ACA uses a cohesive and systematic curriculum which challenges and encourages the student to establish correct study habits, learning skills, and an appreciation for education. The integration of technology, project-based learning, and content taught from a biblical worldview are emphasized throughout academics. There is also a strong emphasis on character development as we seek to integrate faith, love, and learning during these formative years.

The K5-Grade 2 program is that of a self-contained classroom with instruction in phonics, reading, penmanship, spelling, Bible, mathematics, science, and history. Beginning in Grade 3, students may have different teachers for core subjects providing meaningful instruction from teachers passionate about their subject areas.

Writing, spelling, reading, and grammar are important components of the language arts program. In addition to the core subjects, students in K5-Grade 5 also have a variety of weekly specials that may include STEM, Spanish, physical education, music, band, theatre arts, and visual art. Students also enjoy a social emotional learning curriculum (SEL), *Friendzy*, which assists students in the development of Christian character as they learn relationship skills that will benefit them throughout their life.

Our loving and dedicated staff uses a variety of teaching methods to meet all learning styles. Teachers are passionate and skilled in the grade level and subject areas they teach, providing an enriching and engaging learning experience.
